INTELLIGENT CYBERSECURITY DELIVERED

Insider Threat Investigation at a Financial Institution

Overview:

A financial institution noticed unusual access to sensitive client data by an employee. The forensic team was tasked with investigating the suspected insider threat and recommending steps for mitigation.

The Problem:

Suspicious Access:

A privileged employee accessed sensitive client data without legitimate business reasons.

Potential Data Misuse:

There were concerns about possible data exfiltration or misuse.

Reputational Risk:

The organization feared damage to its reputation and customer trust if the incident became public.

The Solution:

Actions Taken:
