

AI RED TEAMING vs. TRADITIONAL RED TEAMING

TRADITIONAL RED TEAMING	VS.	AI RED TEAMING
 Human-led		 AI-assisted
 Periodic testing		 Continuous testing
 Manual attack simulation		 Automated attack simulation
 Predefined scenarios		 Adaptive scenarios
 Manual attack-path analysis		 AI-assisted attack-path analysis
 Limited scalability		 High scalability
 Point-in-time validation		 Continuous validation
 Vulnerability-focused		 Exposure -focused
 Manual correlation		 Intelligent correlation
 Slower iteration		 Faster iteration
 Engagement-based		 Repeatable testing
 Primarily expert-driven		 AI + expert -driven
