

Traditional GRC getting enhanced with GRACE Platform

Function	Traditional GRC	GRACE Platform
Compliance Model	Point-in-time, periodic assessments.	Continuous compliance with real-time monitoring.
Implementation Timeline	Typically, 3–12 months.	Operational within 2–4 weeks (6–8 weeks for complex enterprises)
Framework Coverage	Limited out-of-the-box libraries.	50+ frameworks pre-built with custom framework support.
Cyber Risk Quantification	Qualitative and subjective scoring.	Real-time compliance health scores.
Evidence Collection	Manual screenshots, shared folders, spreadsheet trackers.	Continuously secured APIs to capture, validate, version, and map evidence to control in real time.
Audit Readiness	Last-minute preparation.	Always audit-ready dashboards.

Why GRACE Stands Out?

Still Managing compliance?

Operationalize it with intelligence, automation, and real-time control with GRACE.
