

GRC Automation to **Agentic Compliance**

From manual effort to intelligent, orchestrated compliance.

01

Traditional GRC

MANUAL & REACTIVE

Compliance depends on people, spreadsheets and disconnected tools.

- Spreadsheets and siloed data
- Manual evidence collection
- Periodic assessments
- Time-consuming audits

THE REALITY

High effort.
Limited visibility.

02

GRC Automation

AUTOMATED & CONNECTED

Technology takes over repetitive work and centralizes compliance processes.

- Automated evidence collection
- Centralized workflows
- Control and framework mapping
- Reminders and task tracking
- Dashboards and reporting

THE SHIFT

Less manual work.
More consistency.

03

Intelligent GRC

AI-ASSISTED & PROACTIVE

AI helps identify risks, connect controls and surface compliance gaps.

- AI-assisted risk analysis
- Intelligent control mapping
- Continuous monitoring
- Risk prioritization
- Actionable insights

THE OUTCOME

Teams get ahead of what's next.

04

Agentic Compliance

AUTONOMOUS & ADAPTIVE

AI agents work alongside your team to continuously monitor, identify, and act.

- AI agents monitor continuously
- Identify gaps and emerging risks
- Adapt to regulatory changes
- Recommend or initiate actions
- Keep compliance always on

THE IMPACT

Compliance becomes continuous and adaptive.

GRACE

Orchestrated GRC for the next generation of compliance.

GRACE brings AI, automation, risk, controls, evidence, and workflows together—helping organizations move from managing compliance activities to orchestrating compliance continuously.

- Unified**
Bring everything together.
- Continuous**
Stay always audit-ready.
- Intelligent**
Turn compliance into a strategic advantage.
