

PCI DSS vs PCI PIN

Two PCI Standards. Different Security Objectives.

PCI DSS

PCI PIN Security

Protects payment card data

Applies to organizations that **store, process, or transmit cardholder data**

Focuses on **cardholder data security**

Covers **systems, applications, networks, access, monitoring, and security controls**

Designed to reduce **cardholder data compromise**

Commonly relevant to **merchants, service providers, payment processors, and other entities handling card data**

Protects PIN transactions

Applies to organizations involved in **PIN processing and management**

Focuses on **PINs, PIN blocks, and cryptographic keys**

Covers **PIN processing, key management, cryptographic devices, and secure PIN environments**

Designed to prevent **PIN disclosure, manipulation, and unauthorized use**

Commonly relevant to **issuers, acquirers, processors, ATM operators, and entities handling PIN-based transactions**
